

RAPIDASE

HIGH SPEED ENZYMES SINCE 1922

EXTRA PRESS

Enzyme for fast, efficient pressing of white grapes

Rapidase® Extra Press releases juice from white grapes by weakening grape skins and reducing pectin water retention capacity. Its use increases juice yields and improve must clarification. **Rapidase Extra Press** therefore allows for shorter pressing cycles thus preserving grape must from oxidation.

Rapidase® Extra Press

- Is a liquid pectolytic enzyme preparation with essential side activities. **Rapidase Extra Press** naturally contains negligible levels of *Cinnamyl esterase* (nFCE) in order to preserve aroma freshness whichever your yeast choice might be.

Use and dosage

- Add as early as possible on grapes upon reception or after crushing in non oxidative conditions ;
- Avoid immediate draining after enzyme addition to allow enzyme distribution onto grapes ;
- 1,5 to 2,5 mL/100 Kg:
 - on destemmed grapes: 1,5 to 2 mL/100 Kg ;
 - on whole cluster grapes: 2 to 2,5 mL/100 Kg ;
- Active from 10 to 45 °C, (50 to 113 °F). The activity increases with temperature ;
- Active within the wine pH range and in the presence of normal concentrations of SO₂.

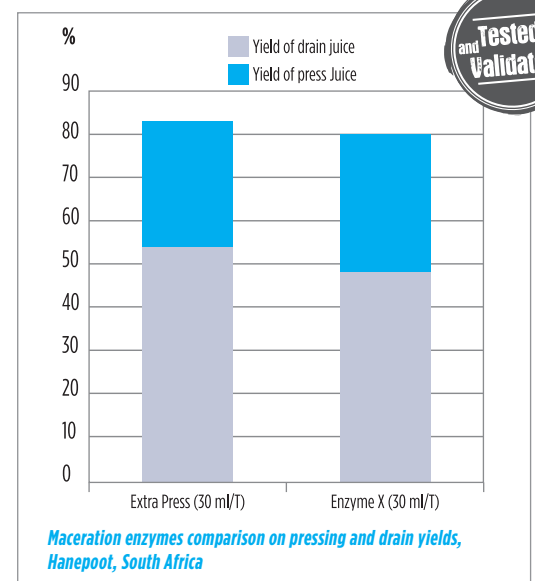

Peace of Mind comes with DSM enzymes

Rapidase enzymes are made by DSM one of the very few global market leaders in food enzymes. DSM enjoys the longest history in producing winemaking enzymes and commits to its reliability through its **Quality for life™** program. This commitment assures you that any DSM ingredients you are buying is safe in terms of quality, reliability, reproducibility and traceability but also is manufactured in a safe and sustainable way. Any product specification, Material Safety Data Sheet, allergen and non GM, manufacturer certificates is available upon request.

Tested and Validated

To offer the best efficiency in application each **Rapidase** formulation is developed and **tested** with the world most renowned wine research institutes and **validated** in wineries at production scale.
